

FATIMA Miracle of the Sun

October 13th, 1917

It had rained the whole night before and all was very muddy. Most people had umbrellas.

It was still raining when all the crowds came. Around 70,000 people.

The rain suddenly stopped and the sun appeared. It was like a dull silver disc that you could look at without it hurting your eyes.

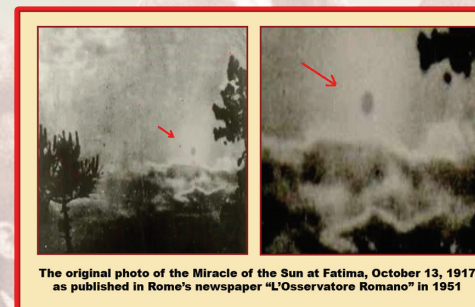

Suddenly the sun left its place in the sky and started to fall and come closer and closer to the people. Many screamed thinking they'd die!

Many non-believers and newspaperers were there. All admitted a miracle.

The sun's disc did not stay still, for it spun round upon itself, it made a whirl like a firewheel, taking on all the colors of the rainbow, which also colored all the land and people. This "dance of the sun" was seen by the 70,000 witnesses. It was repeated three times during the course of the 10 minute long miracle.

The original photo of the Miracle of the Sun at Fatima, October 13, 1917 as published in Rome's newspaper "L'Osservatore Romano" in 1951

Just as suddenly, the sun stopped its fall upon the people and returned back to its normal place in the sky. The people were both frightened and overjoyed at this miracle that Our Lady had promised three months before. Another miracle was that everyone's clothes had been dried in just a few seconds.

The masonic newspaper "O Seculo" editor saw and wrote of the miracle.

The local masonic newspaper "O Seculo" even reported the occurrence of the miracle!
